

40. (New) A digital right management system comprising:
- a secure environment;
 - an application programming interface which provides interface between said secure environment and a third party software;
 - said secure environment processes the requests coming from said third party software through said application programming interface; and
 - said secure environment validates one or more documents to verify that said one or more documents are compatible with said secure environment.

41. (New) A digital right management system comprising:
- a secure environment;
 - an application programming interface which provides interface between said secure environment and a third party software;
 - said secure environment processes the requests coming from said third party software through said application programming interface; and
 - said secure environment validates signatures of one or more documents to verify that said one or more documents are compatible with said secure environment.

42. (New) A digital right management system comprising:
- a secure container;
 - an application programming interface which provides interface between said secure container and a third party software;
 - said secure container processes the requests coming from said third party software through said application programming interface; and
 - said secure container validates signatures of one or more documents to verify that said one or more documents are compatible with said secure container.

43. (New) A digital right management system comprising:
- a secure repository;
 - an external interface which provides interface between a processing means and external environment;
 - said secure repository processes requests for access to a digital work; and

said secure repository checks usage rights, and after checking, grants the access to
said digital work.
